Birds are flying south. Temps are dropping. Snow is just around the corner.
That's right, Fall is upon us and we couldn't be more excited.

That's because our men's, women's and kids' slippers are handcrafted by skilled artisans for unmatched comfort. Using only soap and water, they hand felt each pair, molding layer upon layer of natural wool into a soft, cozy booty finished with a removable, padded wool insole and a durable natural latex outer sole.

The weather's not the only thing changing. Our kids' slippers have a new and improved design. Now with a side notch, they're even easier to slip on and as comfortable as always.

Another recent addition to our Mel collection is a bold orange hue sure to warm hearts as much as our slippers warm feet. Overall, our slippers are available in an array of styles and colors for adults and children so you can welcome the cold season with open arms and woolly feet.
